WHAT'S NEW IN PANDORA FMS 7.0 NG 708

Pandora FMS 7.0 NG, package 708, contains numerous functional improvements and visual upgrades. Here's a selection of some of the most important changes on the latest version:

Visual improvements

- * Incorporation of the reporting option in the Dashboards and the Transactional Maps of the location.
- * The possibility of **choosing the color of the graphics** in the widgets has been added.

- * The size of the module's names can be increased on the Export server.
- * Improvements of the Visual console **visualization and representation**.
- * **Inclusion of the percentil configuration token** for the calculations in the visual options of the Metaconsole.

- * Improved string-style module information visualization in the data tables.

Other improvements

- * Now, the **type of agent** (network , software, or satellite) **can be recognized from the Console**.
- * Changes have been made in **ACLs to optimize the user´s access to the menus**.
- * It is possible to **interpret the images stored in the string-type modules** through the visual consoles.
- * **Improved SNMP console** by introducing active filter indications similar to event ones.

The screenshot shows the 'SNMP CONSOLE' interface. At the top, there is a green header bar with the text 'SNMP CONSOLE'. Below it, there is a 'Toggle filter(s)' button. Underneath, the 'ACTIVE FILTERS' section contains several filter buttons: 'Pagination 50', 'Status Unvalidated', 'Group by Enterprise String / IP No', and 'Trap type None'. Below the filters, it says 'Total items : 11'. The main part of the screenshot is a table with the following columns: 'Status', 'SNMP Agent', 'Enterprise String', and 'Trap subtype'. The table contains 11 rows of data. The first two rows have a red square in the 'Status' column and the agent '192.168.50.253a' with a star icon. The next eight rows have a red square in the 'Status' column and the agent '123456789012345678901234567890123456789012345' with a star icon. The last row has a red square in the 'Status' column and the agent '12345678901234567890123456789012345' with a star icon. The 'Enterprise String' column contains values like '1.2.3', '.1.3.6.1.4.1.18719.999.7973.848.1263672.2.1', and '.1.2'. The 'Trap subtype' column contains values like '654', '1234', and '1'. The rows are highlighted in alternating colors: blue, green, and blue.

Status	SNMP Agent	Enterprise String	Trap subtype
■	192.168.50.253a ★	1.2.3	654
■	192.168.50.253a ★	1.2.3	654
■	123456789012345678901234567890123456789012345 ★	1.2.3	654
■	123456789012345678901234567890123456789012345 ★	1.2.3	654

■	123456789012345678901234567890123456789012345 ★	1.2	1

- * It is already possible to **assign politics to entire groups of agents**.
- * It includes the **help of the macros** from different IPs.
- * Improvements have been made in the Management of each user's refresh pages.

- * It has been added the possibility of creating modules or network components from the SNMP browser.

- * Some improvements as well in the GIS maps from Pandora FMS in the agent of Android (Pandroid)

Problems solved

- * On the visual console, problems regarding refreshing, poor fit, and the creation of module graphics for non-admin users have been solved.
- * **Fixed bugs in the alert view** with the name of the representative and the SNMP alerts.

- * **Solved LDAP configuration problem** when saving selected groups.
- * **Fixed uninstall failures of DEBIAN and Tarball** from the Pandora FMS agent.
- * **Database and database history problems solved** in state checking, data copying and query log4x type modules.
- * **Fixed problems in policies** for module macros and data visualization of data server modules.
- * Debug agents mode problem solved.
- * Fixed bug with sending data to secondary server..

- * **Graphical problems have been solved** in the automatic graphical macros of the report templates, and in the visualization of the modules **in the Metaconsole**.
