WHAT'S NEW IN PANDORA FMS 7.0 NG 710

The latest Pandora FMS update package is already available, featuring important improvements and visual changes. Some of the most important changes are listed below:

Visual improvements

- * Better message **visualization and translation** on reports.
- * **Description box added** in the HTML view of Metaconsole reports.

The screenshot shows the Pandora FMS interface for a report titled "dev_7 event report". At the top, there is a "TEST" tab and a toolbar with various icons. Below the toolbar, there is a "Description test" section with a "Set initial date" checkbox and a "Get PDF file" button. The "Items period before:" is set to "2017/08/07 12:41:03" with an "Update" button. Below this, there is a dashed box containing the following information:

Generated: August 7, 2017, 12:41 pm
Report date: August 7, 2017, 12:41 pm
Description: Description test

The main report area shows "dev_7 event report" for "dev_7" with a time range of "(1 days) From: August 6, 2017, 12:41 pm To: August 7, 2017, 12:41 pm". Below this, it states "Total events: 10".

Status	Name	Type	Severity	Value	Timestamp
✓	Module 'CPU IOWait' is going to NORMAL (0)		Normal	System	August 7, 2017, 5:20 am
✓	Module 'CPU IOWait' is going to WARNING (14)		Warning	System	August 7, 2017, 5:30 am
✓	Module 'CPU IOWait' is going to NORMAL (1)		Normal	System	August 7, 2017, 3:40 am
✓	Module 'CPU IOWait' is going to WARNING (11)		Warning	System	August 7, 2017, 3:40 am
✓	Module 'CPU IOWait' is going to NORMAL (0)		Normal	System	August 7, 2017, 1:20 am
✓	Module 'CPU IOWait' is going to WARNING (10)		Warning	System	August 7, 2017, 1:15 am
✓	Module 'CPU IOWait' is going to NORMAL (0)		Normal	System	August 6, 2017, 7:10 pm
✓	Module 'CPU IOWait' is going to WARNING (11)		Warning	System	August 6, 2017, 7:05 pm
✓	Module 'CPU IOWait' is going to NORMAL (0)		Normal	System	August 6, 2017, 2:15 pm
✓	Module 'CPU IOWait' is going to WARNING (14)		Warning	System	August 6, 2017, 2:10 pm

- * Various improvements in the **visual console and Metaconsole**.
- * Better visuals on **dynamic and combined charts**.

- * Button to select the current day in planned downtimes added.
- * **Better navigation** between different Dashboards.

Other improvements

- * **Service manipulation using API** is now possible.
- * Queries in the Pandora FMS server optimized.
- * **Agent alias in GIS maps** now included.

- * Password reset process improved.
- * **SNMP recognition features** in Satellite server improved.
- * Web server cookies optimized.

- * A chart with all the events in the **last 24 hours of each module** added in the console:

- * Improvements in group ACLs.

Problems solved

- * Fixed issue when setting the units of measure of the modules in advanced console settings, instead of in the module configuration.
- * Bug in GIS maps with Google maps now fixed.
- * Time rank adjustment in module charts for non-admin users debugged.

- * Recognition tasks of new agents debugged.

- * Post-process failure in massive operations on modules fixed.
- * Problem with PDF reports with Chrome now solved.
- * Time rank in SNMP interface chart in the Metaconsole for non-admin users is now debugged.
- * Error messages in local modules fixed.
- * Problem with secondary servers in slave mode in Metaconsole environments which could not access it due to belonging to a different network is now fixed.
