WHAT'S NEW IN PANDORA FMS 7.0 NG 713

This new Pandora FMS 7.0 NG 713 package contains numerous improvements in its functionality as well as visual changes. In addition, a number of problems have been solved. The most important changes are listed below.

Visual improvements

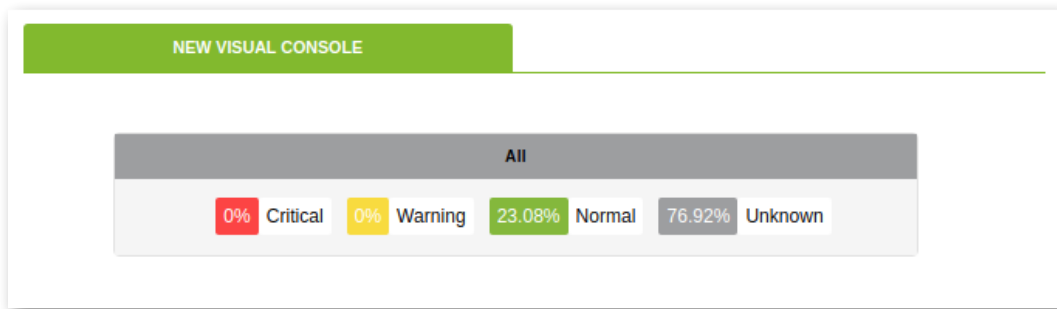

- * **Performing multiple operations** with visual console element is now possible.
- * A visual indicator to know when an agent is included in planned shutdown has been added.
- * **Visual improvements** have been made in the events that show the last 24 hours of an agent.

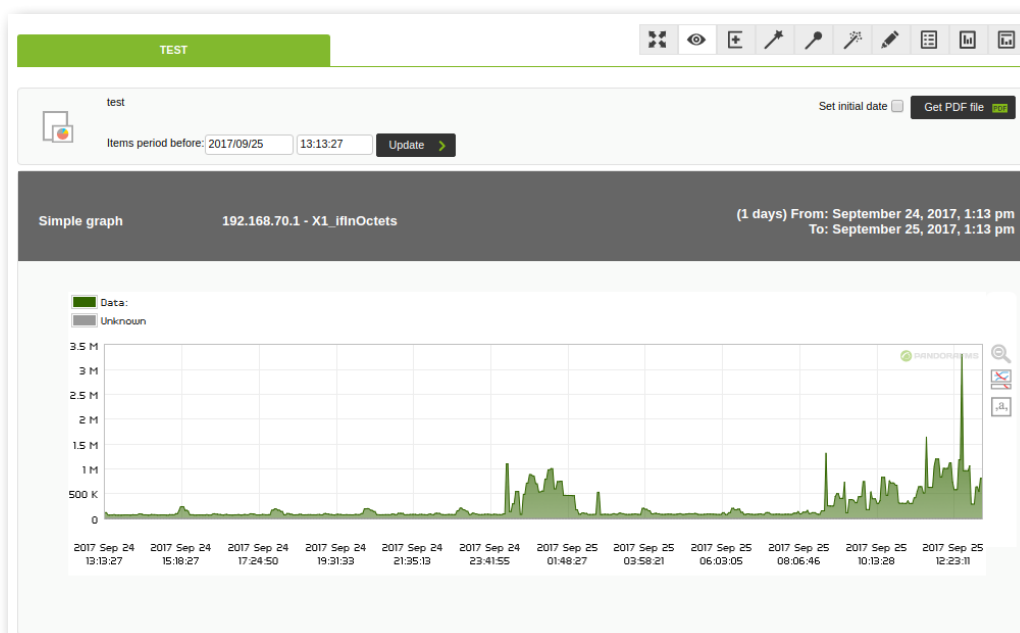

- * **Revised and improved the CSS style** (Cascading Style Sheets) of help pages.

- * An option has been added inside the group icon that generates a **summary of the group elements** in the visual console.

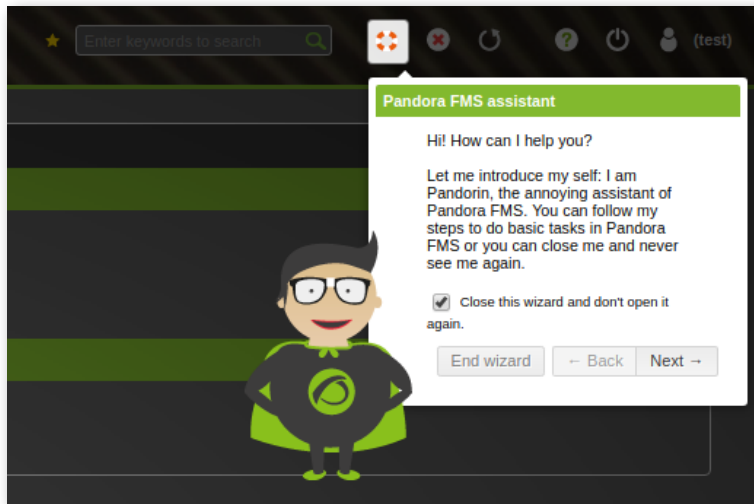

- * The appearance of the agent management wizard in the metaconsole has been optimized.
- * **Selecting logos in .png format** (and not only in .jpg) in Pandora FMS reports is now possible.
- * A checkbox has been included in the node and metaconsole report elements to **create TIP graphics reports** (of actual data) in the **“Module Graphic”** element.

- * **Improved translations** in the shortened data field.

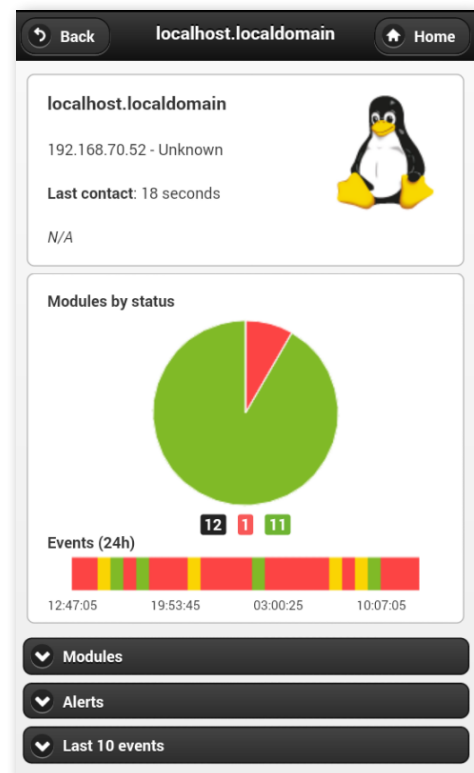

- * The visual **aspect of Pandora FMS help has been improved** when selecting the "blacktheme".

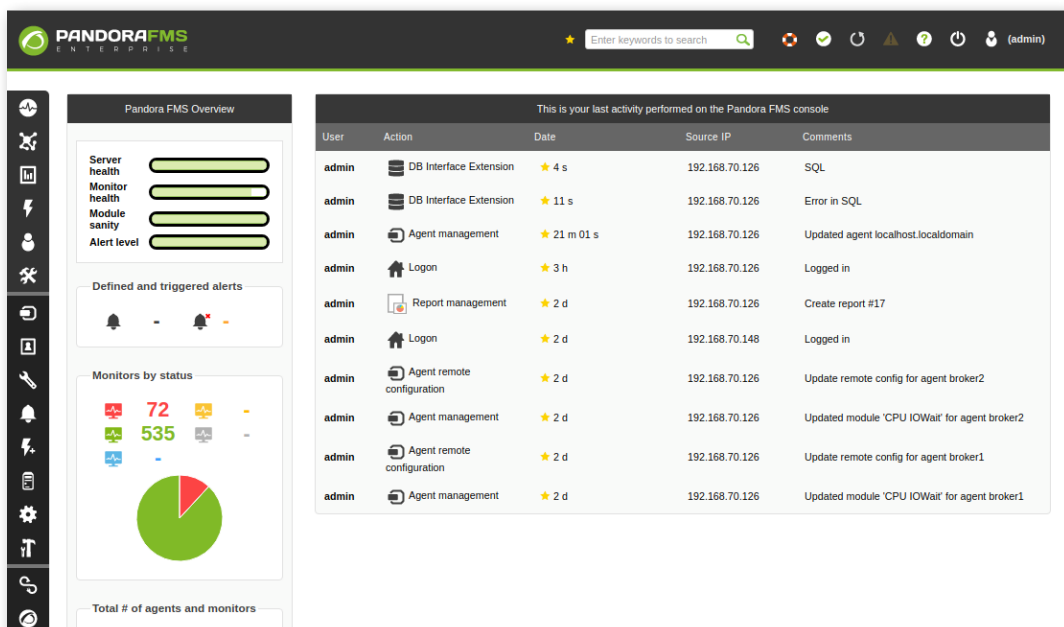

Other improvements

- * The functionality of **creating, editing and deleting visual consoles from command line** is now included.
- * We have made **permission improvements** based on the user profile in the report submission "**cron jobs**".
- * Organization of events in Pandora FMS **mobile application now improved**.
- * Improvements have been made in policy development based on existing components.
- * Added TIP option in the interface graphs to visualize the actual data at full scale.

- * We have **improved the performance of macros in the combined graphs** of the report templates.
- * Having **blacklists of networks to receive SNMP, WMI, ICMP or exec type checks** on the satellite servers is now possible.
- * From now on, the agent will not fail when a drive does not exist in a **module_freedisk_percent** type module.
- * **Improvements made to the last activity panel** when using the database interface.

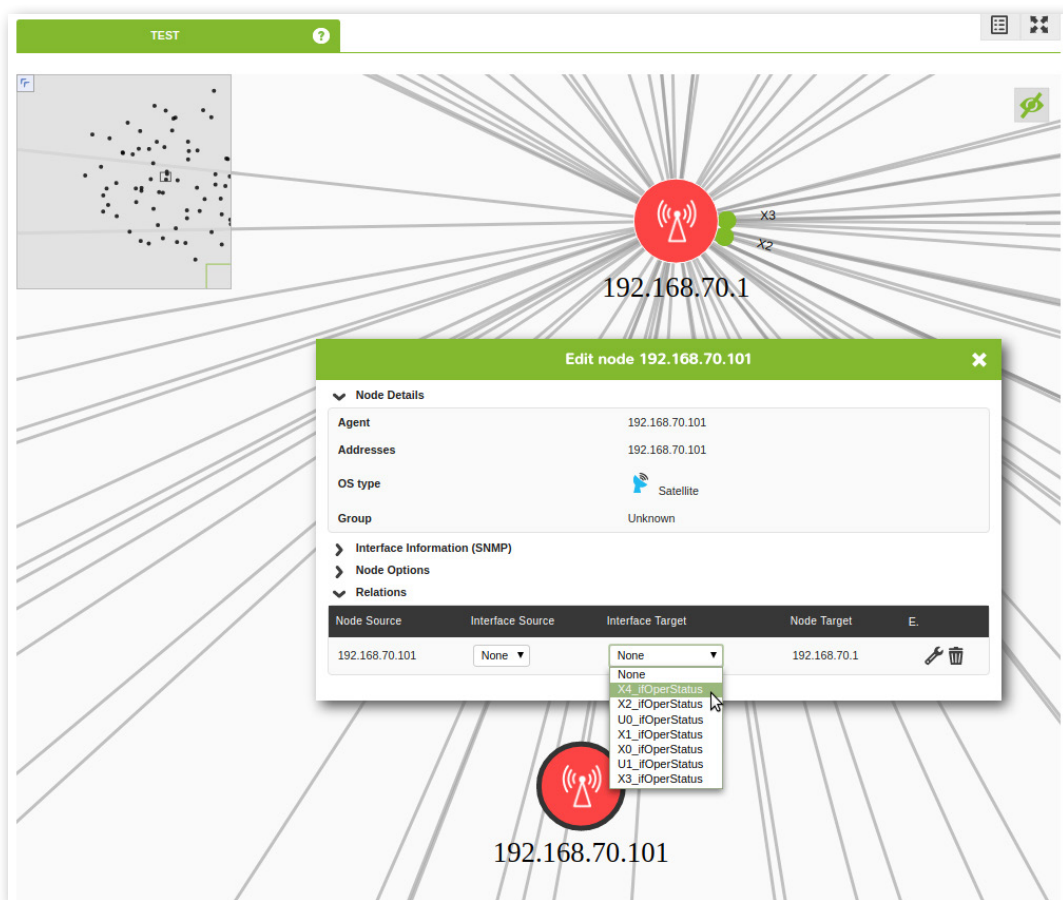

- * Improvements made in the graphics of **"customgraph"** modules.
- * Improvements made in **policy macros**.

Solved problems

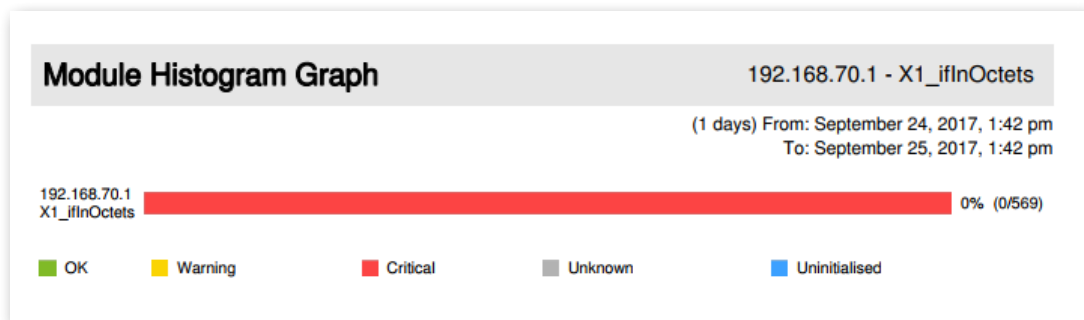

- * Fixed bug in the creation of programmed stops.
- * Fixed problem in agent name sorting in the "detail monitor" view.
- * Fixed the problem of linking an added agent by reconnecting the satellite server with another device from network maps.

- * Fixed the error in the calculation that is done to determine if there are fallen Pandora FMS servers.

- * Fixed error in the formatting of the information coming from the string type data modules that appears in the data table.
- * Fixed bug when displaying the image with the graphic when configuring a PDF report to be mailed.

- * Fixed visual bug with "AutoSLAGraph" type elements in the visual consoles.
- * Fixed bug in the remote configuration of Unix/Linux agents in local mode.
