WHAT'S NEW IN PANDORA FMS 7.0 NG 721

This last update package of Pandora FMS 7.0 NG contains improvements as well as visual changes and includes the resolution of some problems. A list of the most important changes can be found below.

Visual Enhancements

- * Changes in the audit log.
- * Tree view for non-initiated agents or modules.

- * Digital clocks.
- * Graph values.
- * Elements of each of the specific profiles.

- * SQL graphics of custom reports.
- * Network Map Relationships.

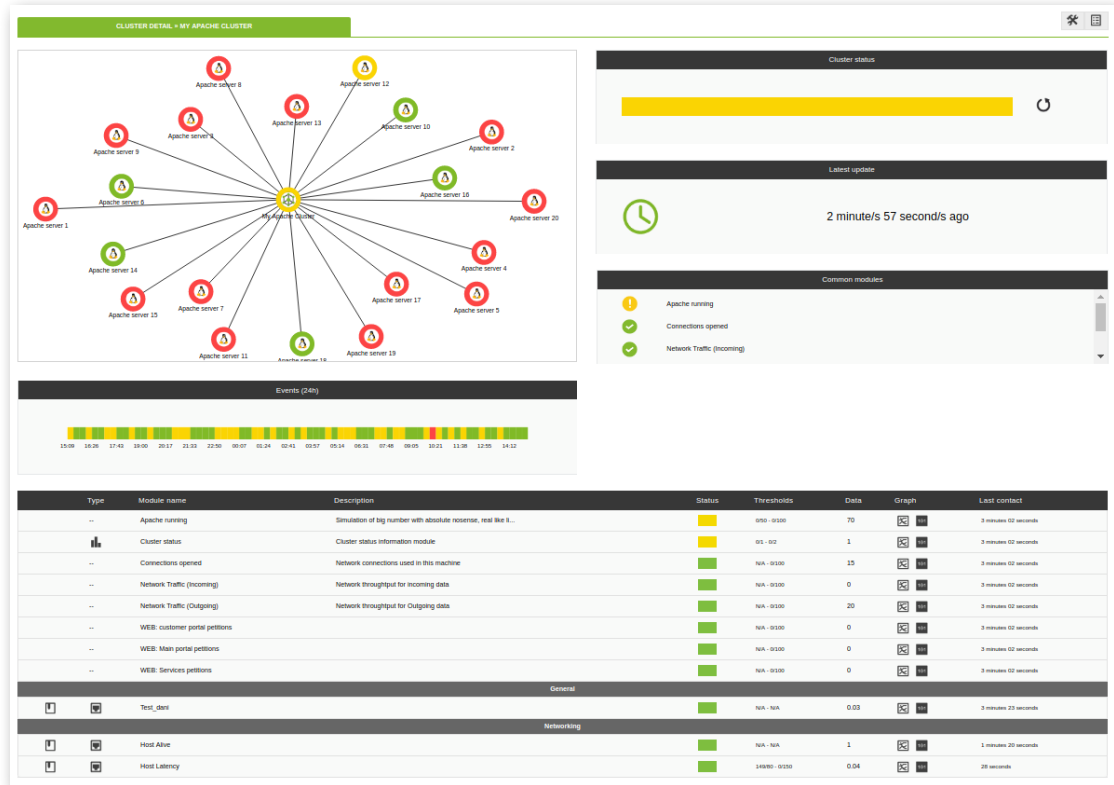

- * Dashboards in Firefox.
- * Description of the MIBs in the SNMP queries from the Pandora FMS console.
- * Full scale reports of network interface type in the meta console.
- * Non-initiated agents in the tree view of the metaconsole.

New features

- * It is now possible to apply templates to an agent using API/CLI.
- * Assigning tags to events once they have been created.
- * Implementation of secondary groups.
- * Migration of agents from the meta console via API/CLI.

Regarding cluster functionality

- * A group filter with recursion has been added.
- * An agent search engine has been incorporated.
- * ACL permissions have been optimized in both the cluster view and the creator.

Additional improvements

- * The management of permissions in the scheduled tasks.
- * The help of the agents.
- * Login with SAML.
- * The pagination of events after applying filters.
- * SNMP modules with communities with entities.

- * Exporting logs to CSV on Windows computers.
- * The policy section in the tree view.
- * The access to file collections.
- * Alert validation.

Solved problems

- * The problem with monitoring the Windows log security has been solved.
- * The bug in policies that do not adopt modules has been fixed.
- * The remote server configuration log problem for NMS licenses has been fixed.
- * The bug in editing parameters in VMware plugin has been fixed.
- * The SLA report error has been fixed.
- * The problem with special characters in the passwords to access Pandora FMS has been solved.
- * The SQL bug in the report view by those created through the wizard has been fixed.
- * The problem with creating modules with CLI has been solved.
