Sharing session with third parties

One of the most relevant features of Pandora RC (previously called eHorus) is the possibility of sharing access to a machine with another person, temporarily and without having to share any credentials, just with a public URL.

Once connected to an agent you can, from the share option, create a temporary link to the machine to be able to share it with a third party. This person just has to use that link in their browser and they can have full access to that machine. If the machine has a local password, this password will not be used for connection sharing. Once the session expires, the link will be unusable.

Remember that only one session can be active at a time to a machine, so after generating the URL, you will have to disconnect from the machine before the person receiving the URL can connect.

PANDORARC Terminal Display Processes Services Files Share (DESKTOP-KH...)

Share the access to this agent

Expiration in minutes

Generate URL 15

With this url, people will access directly to the agent during the time specified and without the requirements of having an account or being logged in

<http://moho.artica.es/client/eyJhZ2VudEEljoiYWlZVGxBenZRIiwidG9rZW4iOiUleUpoYkdjaU9pSkIvekkxTmlJc0luUjVjQ0k2SWtwWFZDSjkuZXIKcFpDSTZNU3dpYm1GdFpTSTZJbUZRyYldsdUlpd2lZV>

Remember to disconnect from this agent to allow the connection of another user **Disconnect now**
