

QuickGuides

Pandora FMS Quick Guides

Welcome to our small section of quickguides and howtos, the old school documentation for people without patience.

The main purpose of this section is to write small guides (of no more than 3-4 pages) for specific tasks, following a very practical approach, based on examples and lots of screen shots. We are going to publish all the contributions that have been sent. If you have something that you consider interesting, please send it to info@pandorafms.com.

All small texts and quick guides to specific issues will be put here, and all in-depth articles will be put in our official documentation section. When a quickguide ceases to be small and quick, it will be moved (and translated) to the main documentation.

Recommended guides

- [What is Pandora FMS](#)
- [First Steps \(ISO/Centos\)](#)

Other guides

- [Pandora FMS Enterprise 7.0NG Quick Update Guide](#)
- [Fast monitoring deployment for many hosts](#)
- [Migration from Nagios to Pandora FMS](#)
- [Differences between Templates, Policies and Massive Operations](#)
- [Email alert configuration](#)
- [Setting up the double authentication for a user account](#)
- [Configuring Tentacle with security options](#)
- [Upgrading Pandora FMS from 6.0 to 7.0](#)
- [Migrating Pandora FMS features from 6.0 to 7.0](#)
