# Renaming\_Pandora\_Functions

## Function renaming effort

This will give an overview of the old and new pandora function names as well as a discussion on how/why to apply them.

Use the history of this page to view previous notes.

The full function list can now be generated using PHPDoc.

Install PHPDoc using Pear. Then go to the pandora\_console directory:

```
mkdir doc
```

```
phpdoc -o HTML:frames:earthli -f  
include/functions.php,include/functions_exportserver.php,include/functions_incidents.php,  
include/functions_visual_map.php,include/functions_db.php,include/functions_extensions.p  
hp,include/functions_reporting.php,include/functions_events.php,include/functions_html.ph  
p,include/functions_ui.php -t doc
```

A current sample can be found: [http://rcbi.rochester.edu/pandora\\_console/doc/](http://rcbi.rochester.edu/pandora_console/doc/)
